# **Thermal Management**

Dixon® delivers custom-engineered cooling solutions and components that directly address the unique heat dissipation challenges of data centers. Our superior components and expert design enhance system performance and efficiency while boosting reliability and ensuring smooth and cost-effective operation.

#### **Commitment to High-Quality Components**

Dixon prioritizes high-quality components, recognizing their crucial role in the performance and longevity of data centers.

#### **Key Product Offerings**

- · Combination nipples
- Hydraulic quick disconnects
- Sanitary valves
- Clamps

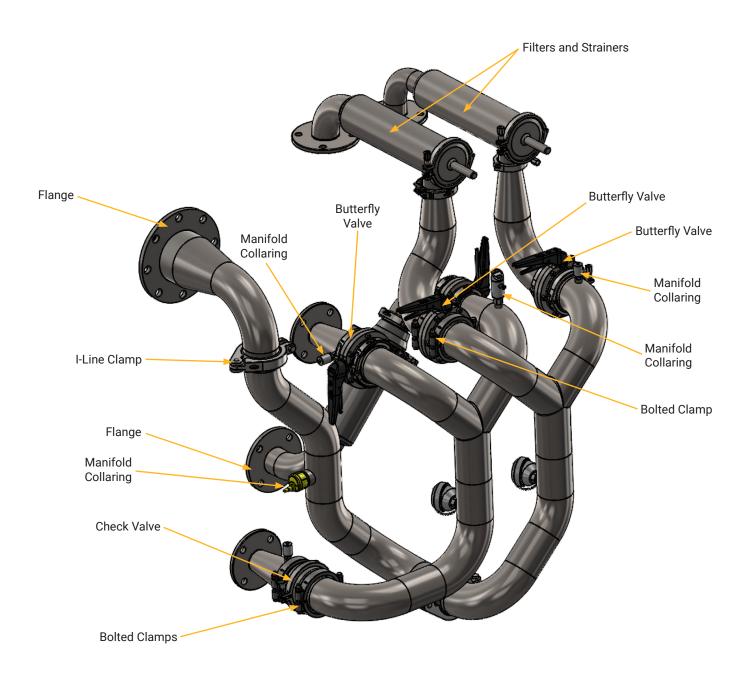

### **Tailored Solutions and Engineering Support**

Supported by an experienced engineering team, Dixon delivers tailored solutions designed to address specific data center cooling challenges.

## **CDU Rack Assembly**
